

Hospital Emergency Response Training (HERT) for Mass Casualty Incidents Course

In conjunction with the Center for Domestic Preparedness (CDP), CVHC will be hosting a three-day Hospital Emergency Response Training Course. The Hospital Emergency Response Training for Mass Casualty Incidents (HERT) course addresses healthcare response at the operations level for the facility and its personnel. This three-day course prepares healthcare responders to utilize the Hospital Incident Command System — integrating into the community emergency response network while operating an Emergency Treatment Area as hospital first responders during a mass casualty incident involving patient contamination. The healthcare responders will determine and use appropriate personal protective equipment and conduct triage followed by decontamination of ambulatory and non-ambulatory patients as members of a Hospital Emergency Response Team.

To be eligible for the course, the student must successfully complete the following courses: All three courses can be done online by clicking the link.

- [IS-100.c, Introduction to Incident Command System for Healthcare/Hospitals](#)
- [IS-200.c, ICS for Single Resources and Initial Action Incidents;](#)
- [IS-700.b, National Incident Management System, An Introduction.](#)

June 5th 2024 and June 18th-19th 2024.

Attendance is required for all three days.

To Register go to: <https://form.jotform.com/240516642875158>

Once registered here, you will be sent instructions on how to register with the CDP, and student information for the course.
